

RocketCyber

SOC-AS-A-SERVICE
BUILT FOR MSPs

ABOUT ROCKETCYBER

A managed SOC platform built for and empowering managed service providers to deliver 24/7 billable security services to small-medium businesses.

LEARN

Since 2017

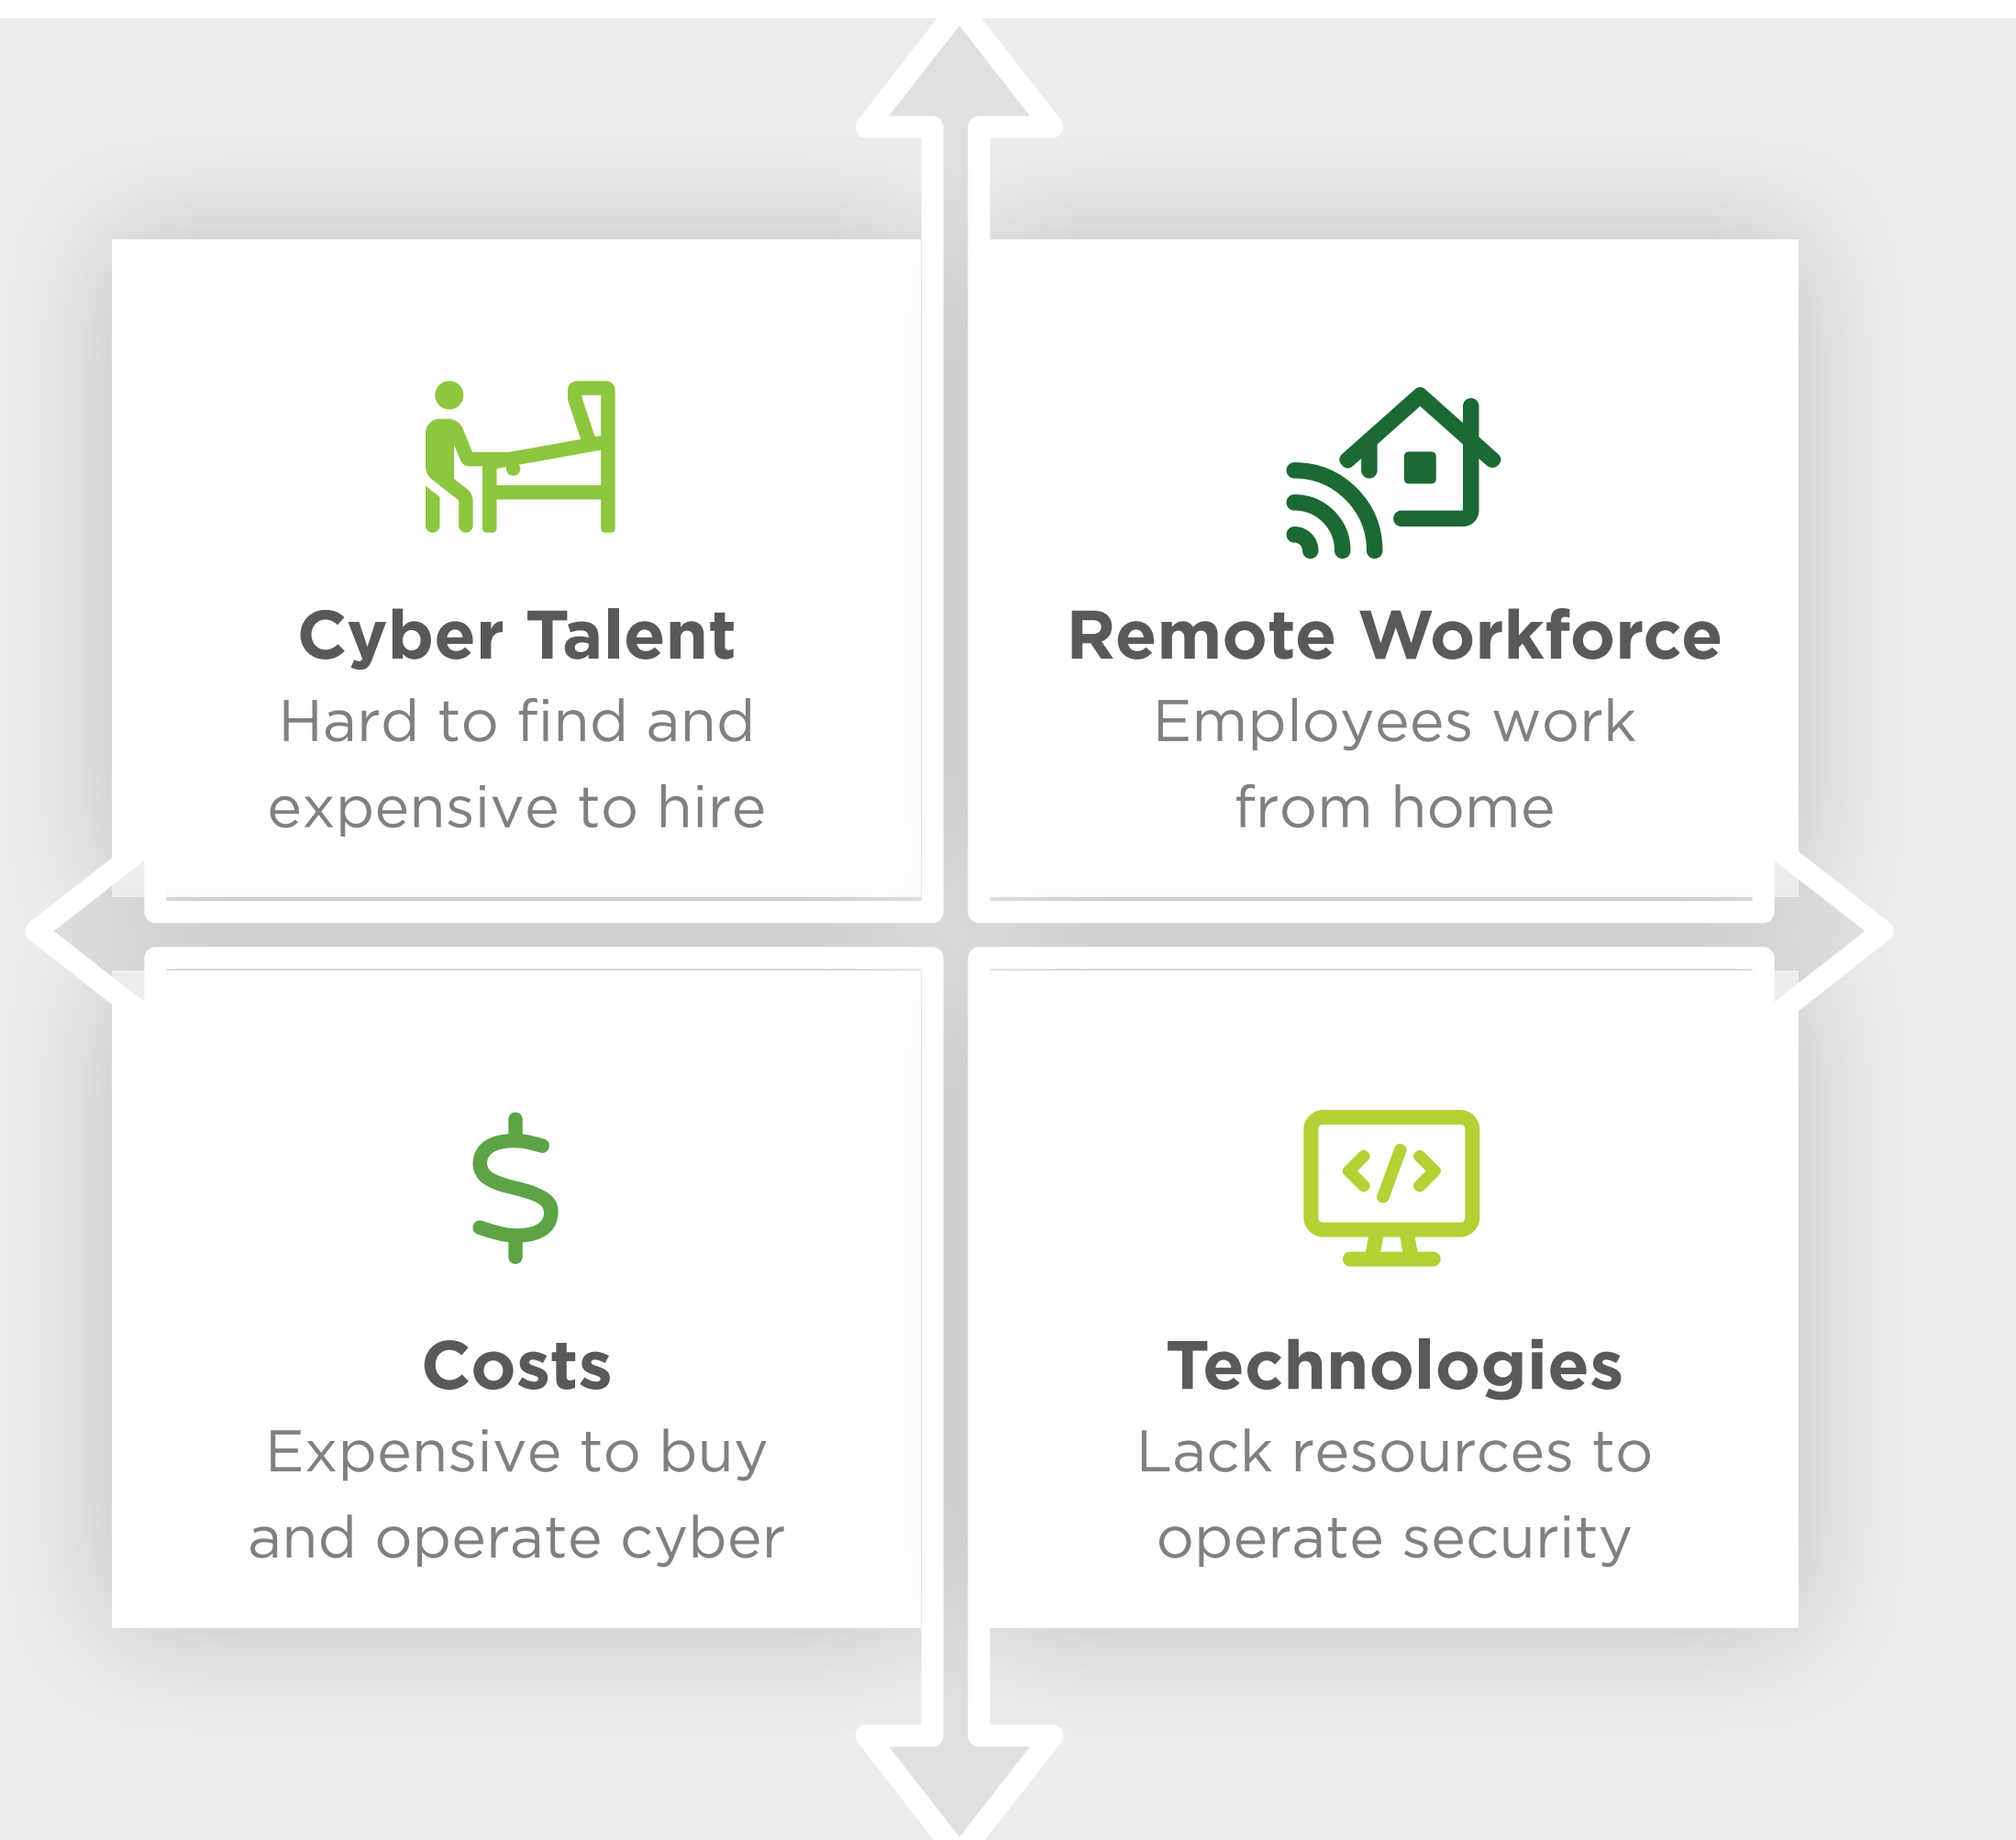

Over the last three decades we've developed vulnerability scanners, intrusion detection, antivirus, and a number of security and compliance technologies. RocketCyber leverages our backgrounds and brings it all together into a multi tenant cloud ecosystem.

History

Founders of RocketCyber
Founded iScan Online, now SolarWinds
Founded Citadel Security, now McAfee
6 US Patents

SMB

CHALLENGES

The challenges for SMBs dealing with cybersecurity are two-fold: one is technical aligning to the technologies to safeguard the client; the other is the financial costs for operating and acquiring tools.

The combined partnership between the MSP and the RocketCyber SOC remove these barriers by delivering a 24/7 service with security veterans, a platform for protecting on and off the network devices and as an OPEX expenditure.

SECURITY STACK

Managed Service Providers leverage numerous security tools to perform specific detection and prevention tasks. These tools produce daunting volumes of data. RocketCyber's SOC-as-a-Service integrates with the MSP's security stack, triages the threat data, and escalates actionable threats that require immediate attention as a security incident accompanied with a remedy.

INTEGRATIONS

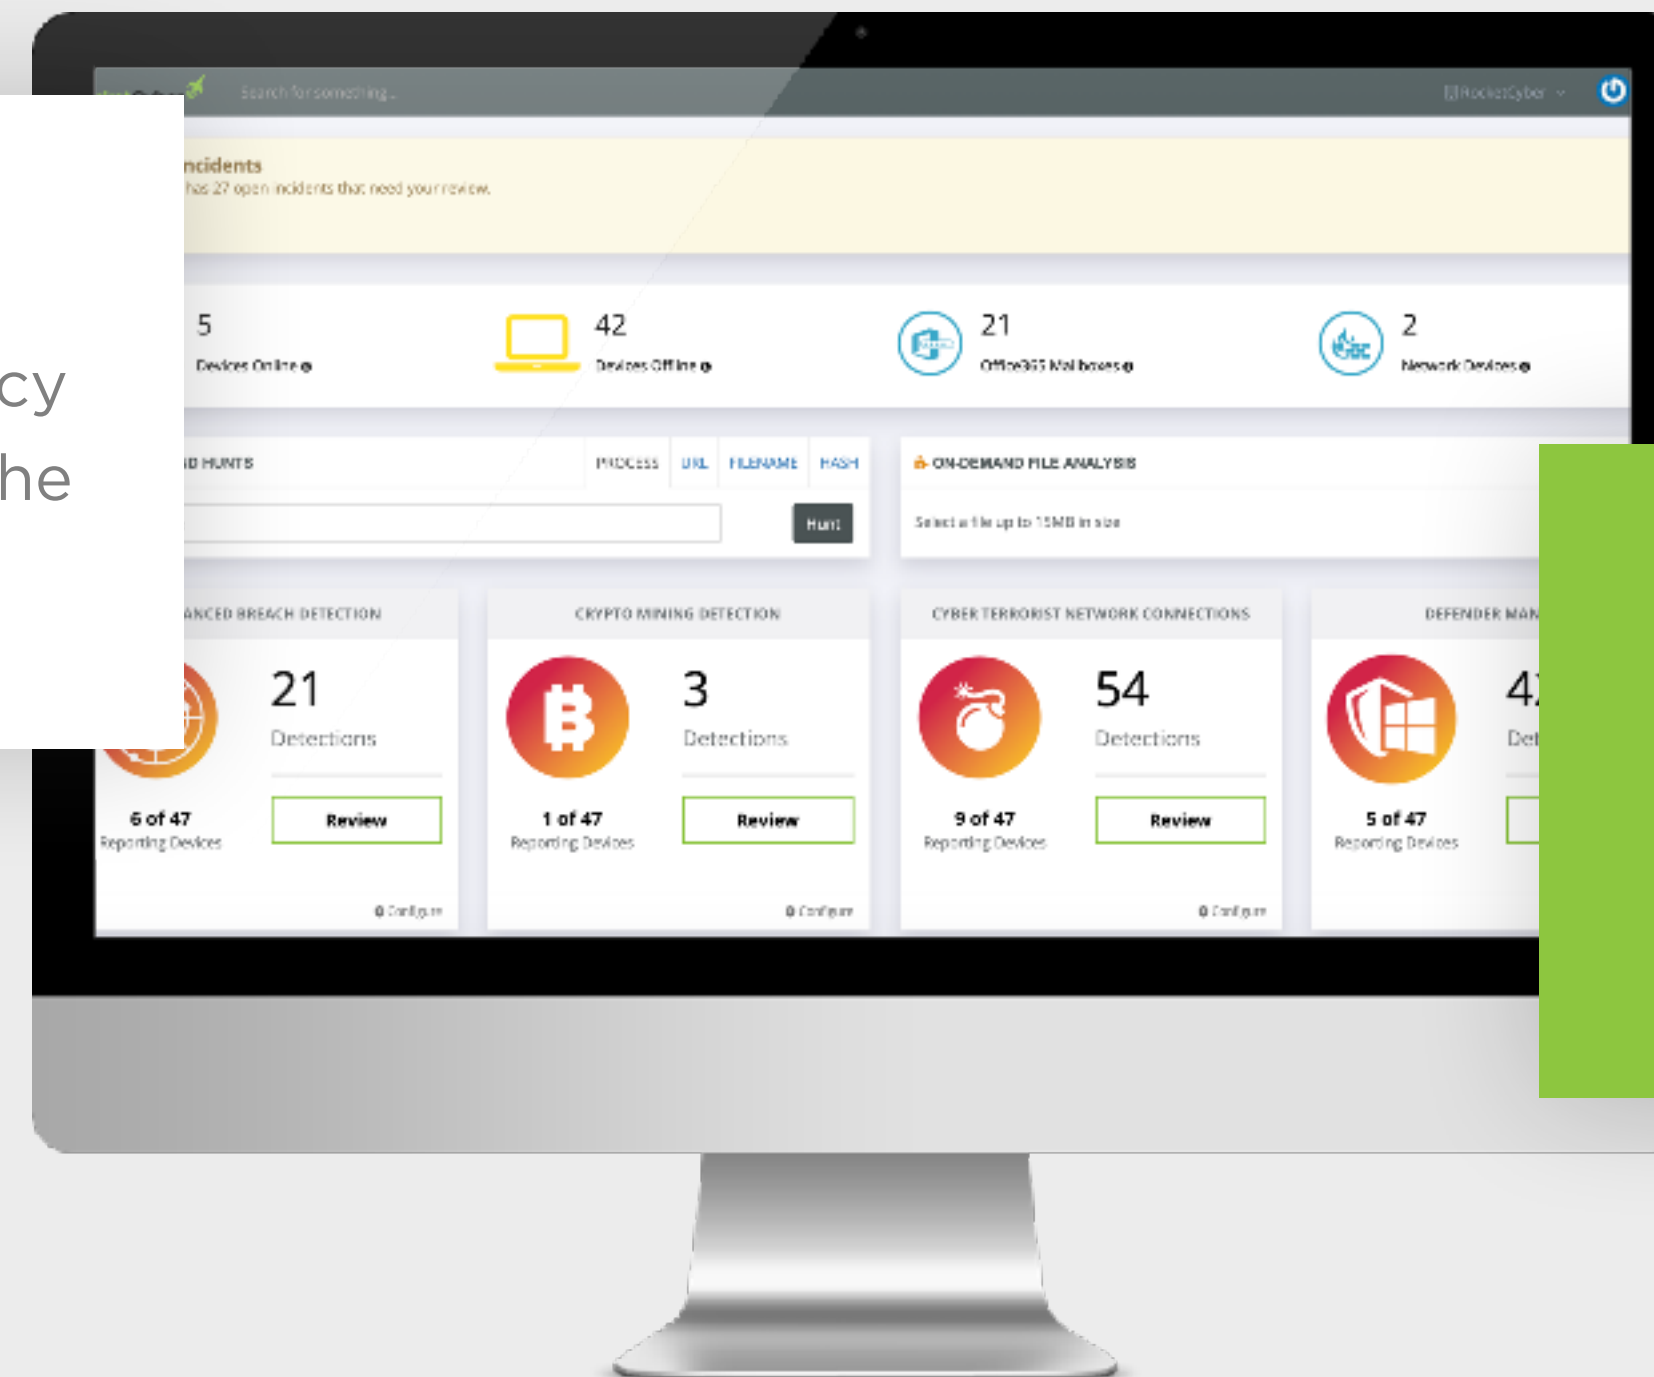

INTRO SOC PLATFORM

The RocketCyber SOC Platform is the foundation for delivering the industry's first 24/7 SOC-as-a-Service without requiring hardware. Architected for the MSP, the multi-tenant cloud solution provides insight and visibility across your fleet of customers, and integrates with your preferred security stack. The platform offers popular PSA and RMM integrations for ticketing, provisioning and deployment.

LEARN

CONSOLE

Cloud based multi-tenancy to deliver 24/7 SOC for the MSP's fleet of clients.

AGENT

Lightweight Windows and macOS agent for threat detection and response.

ROCKETCYBER APP STORE

The RocketCyber built-in app store bolsters over 30 purpose-built threat detection apps identifying malicious and suspicious activity. These apps run on the RocketCyber cloud and simply flip the switch to ON for threat coverage. No separate installation required.

APP STORE

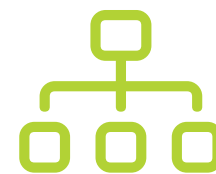

Endpoint

Malicious files, scripts,
log data, remote
access, hacker utilities

Network

Firewalls, DNS, IDS, log
data, TCP/UDP
connections

Cloud

Office 365, Azure, Email
compromise, logins,
mail forward rules

WHAT WE MONITOR

An attack vector is the method or entry vehicle used by an adversary to penetrate and successfully compromise a corporate asset. RocketCyber monitors three critical attack vectors by collecting data, detecting the threat, creating a security incident ticket to the MSP operator with a remedy and the ability to isolate and contain the threat when needed.

RocketCyber

GET STARTED

RocketCyber is a complete SOC platform backed with security veterans, augmenting your existing IT operations and enables you to grow your 24/7 cyber security service business. We recommend these top five getting started items to begin your SOC-as-a-Service within minutes.

Monthly Payments

Licensed by billable devices (Computers & Firewalls).

*Microsoft 365 user monitoring is included with the service.

Whats Included

- * 24/7 monitoring
- * All apps in AppStore
- * 1-year log retention
- * Tech support
- * Threat remedy
- * Device isolation
- * Phone, chat and email with SOC

HOW WE LICENSE

RocketCyber is a month-to-month subscription aligning to how you as an MSP do business with SMBs. There is a 100 device minimum to begin delivering your Managed Security Service. These devices can be licensed across your fleet of customers.

S I G N U P

RocketCyber

WHY ROCKETCYBER

● 24/7 SOC

Partner with RocketCyber's security staff and augment your IT team

● Threat Remedy

Our SOC includes the remedy, remediation guidance and ability to isolate the threat

● Your Security Stack

We don't force our stack and integrate with your existing investment.

● No Hardware

Industry's only cloud-agent based SOC requiring no SIEM or hardware.

● MSP Operations

We integrate with your business with API connectivity to your PSA and RMM.

● SOC Compliant

We are one of the few certified and audited SOC's for NIST, SOC II and HIPAA
